GETACHEW EKUBAY

FULL-STACK DEVELOPER & AI/ML ENGINEER

Mekelle, Ethiopia | +251 994 659 621 | getachewekubay8@gmail.com | linkedin.com/in/getachewekubay | github.com/Gech-E | getachewekubay.vercel.app

PROFESSIONAL SUMMARY

High-achieving **Full-Stack Developer and AI/ML Engineer** (CGPA: **3.93/4.0**, Great Distinction) with deep expertise in architecting scalable production web platforms and intelligent systems. Specialized in **FastAPI, Node.js, Express.js, Nest.js, React, Tailwind CSS, and Next.js** on the full-stack, alongside **PyTorch, TensorFlow, RAG pipelines, LangChain, AI Agents, Computer Vision, NLP, Speech Recognition, and Recommendation Systems**. Proven background leading technical teams, deploying production models, and optimizing end-to-end architectures for real-world impact.

TECHNICAL SKILLS & CORE COMPETENCIES

AI & Machine Learning:	Recommendation Systems, Computer Vision, NLP, RAG Pipelines, Speech Recognition, AI Agents, LangChain, Chatbots, Deep Learning, Supervised/Unsupervised Learning
Backend & APIs:	FastAPI, Node.js, Express.js, Nest.js, Python, TypeScript, RESTful APIs, Microservices, Async Architecture
Frontend & UI:	React, Next.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Responsive Design, State Management
Frameworks & ML Tools:	PyTorch, TensorFlow, Scikit-learn, Hugging Face, OpenCV, Vector Databases (Chroma/FAISS)
Databases & Cloud:	PostgreSQL, MongoDB, Redis, MySQL, Docker, Kubernetes, AWS, Google Cloud, Git/GitHub, CI/CD

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern | *Memi Trading PLC*

Jun 2025 – Present | Addis Ababa, ET

- Architected and deployed 3 production-grade AI applications utilizing **FastAPI, Node.js, and Next.js**, reducing manual processing time by **65%** for enterprise inventory forecasting and vendor matching.
- Implemented a **hybrid RAG (Retrieval-Augmented Generation)** pipeline with dense-sparse embeddings and vector indexing, powering rapid diagnostic retrieval in a Clinical Decision Support System (CDSS).
- Streamlined backend inference endpoints with asynchronous worker pools, cutting average API latency by **40%**.

Chief Technology Officer (CTO) & Co-Founder | *Gemed Solutions*

Dec 2025 – Present | Mekelle, ET

- Directed an engineering team of 4 software developers and researchers to build an end-to-end AI incubation and analytics platform; secured first 2 commercial pilot clients within 3 months.
- Designed scalable full-stack system architecture using **React, Nest.js, FastAPI, PostgreSQL, and Docker**, delivering real-time predictive analytics and business intelligence for **15+ startups**.
- Established CI/CD deployment pipelines, automated linting/testing protocols, and robust schema migrations maintaining **99.9% uptime**.

Program & Event Coordinator | *Born to Win Tech Club*

Sep 2025 – Present | Mekelle, ET

- Organized 12 hands-on workshops on **Generative AI, Agentic workflows, and Full-Stack Engineering**, expanding active club membership from 45 to **180+ members**.
- Mentored 500+ university students in data structures, algorithms, PyTorch machine learning, and modern web frameworks.

SELECTED PROJECTS

- **AI-Powered Recommendation & E-Commerce Platform** | ***Next.js, FastAPI, PyTorch, PostgreSQL***

  Built full-stack e-commerce engine with collaborative filtering and matrix factorization recommendation algorithms, boosting item discovery by 35%.

- **Clinical Decision Support System (CDSS)** | ***Python, RAG, LangChain, NLP, FastAPI***

  Engineered intelligent diagnostic assistant processing multi-modal clinical symptoms, integrating RAG literature retrieval with 94% precision.

- **Computer Vision Anomaly & Dermoscopy Classifier** | ***PyTorch, OpenCV, CNNs, React, FastAPI***

  Trained convolutional neural network on dermoscopy imaging for skin lesion classification; integrated real-time video anomaly detection via contrastive learning.

- **Autonomous AI Agent Job Matching Platform** | ***LangChain, AI Agents, Vector DB, Express.js***

  Designed autonomous agents evaluating candidate CVs against dynamic job specifications using multi-step semantic reasoning and vector similarity.

EDUCATION & CERTIFICATIONS

B.Sc. in Electrical & Computer Engineering | *Mekelle University*

Expected Jul 2026 | CGPA: 3.93/4.0

- **Honors:** Top Academic Performer & Honorable Graduate of 2026; 1st Place Winner of Mekelle Incubation Center Startup Pitch.
- **Relevant Coursework:** Artificial Intelligence, Data Structures & Algorithms, Computer Networks, Software Engineering, Database Systems.
- **Certifications:** Machine Learning Specialization (Stanford & DeepLearning.AI) | Full-Stack Web Developer (Udacity)
